

ASWANTH K.T

Full Stack Developer | MERN Stack

aswanthkt.official@gmail.com | +91 75609 90989 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | Kannur, Kerala, India

PROFESSIONAL SUMMARY

Full Stack Developer and MERN Stack Developer with hands-on experience building, deploying, and maintaining production web applications. Proficient in Node.js, Express.js, React.js, MongoDB, REST API design, JWT authentication, and AWS EC2 deployment. Currently developing a gym management web application at Hall Dot X, including WhatsApp Cloud API automation and role-based access systems. Background in high-stakes operations leadership builds strong ownership, reliability, and real-world problem-solving in software delivery. Open to Full Stack Developer, JavaScript Developer, React Developer, and Backend Developer roles. Immediately available for full-time positions.

TECHNICAL SKILLS

Backend: Node.js, Express.js, REST API Design, MVC Architecture, Middleware Development

Frontend: React.js, JavaScript (ES6+), Redux, Tailwind CSS, EJS, HTML5, CSS3, Vite

Database: MongoDB, Mongoose, Aggregation Pipelines, Schema Design, Indexing

Auth and Security: JWT, bcrypt, Google OAuth (Passport.js), Session-based Auth, Role-Based Access Control (RBAC)

Deployment: AWS EC2 (Ubuntu), Nginx, PM2, Vercel, Render, Netlify

Integrations: Razorpay, Cloudinary, Nodemailer, Multer, Sharp, TMDB API, Google OAuth

Tools: Git, GitHub, Postman, VS Code, NPM, Microsoft Excel

WORK EXPERIENCE

MERN Stack Developer | [Hall Dot X](#)

March 2026 - Present

Service-based company | Promoted from Intern (Mar 2026) to Full-Time Employee | Project: Gym Management Web App

- Developed a gym management web application handling member onboarding, subscription billing, attendance tracking, and admin dashboards for day-to-day gym operations.
- Engineered an automated fee reminder system using WhatsApp Cloud API and Node Cron, reducing manual follow-up effort by scheduling messages to members before and after payment due dates.
- Built and documented 15+ RESTful API endpoints using Node.js and Express.js, with MongoDB schemas designed for efficient gym data management.
- Implemented Role-Based Access Control (RBAC) with JWT authentication, separating gym admin, trainer, and member portals with protected routes.
- Delivered full-stack features across React.js UI, Node.js backend, and deployment configuration as a promoted full-time developer within the same internship cycle.

Front Line Supervisor | [L&T Construction, Railways Division](#)

Sep 2018 - Feb 2023

- Supervised a team of 15 laborers and heavy machinery operators across live railway track construction and replacement sites, maintaining a zero safety incident record over 4.5 years.
- Coordinated daily scheduling, task allocation, and resource planning for live track-changing operations, ensuring zero errors in a high-risk, time-critical environment.
- Produced and maintained contractor billing reports and material tracking documentation in Microsoft Excel, supporting cost management and compliance across multiple project phases.

PROJECTS

EarCrafters: Full-Stack E-Commerce Platform [[Node.js](#) · [Express.js](#) · [MongoDB](#) · [EJS](#) · [AWS EC2](#) · [Nginx](#) · [PM2](#)]

[Live](#) | [GitHub](#)

- Engineered a complete e-commerce platform from scratch with separate admin and user portals, session-based authentication with bcrypt password hashing, and Google OAuth via Passport.js.
- Deployed on AWS EC2 (Ubuntu) with Nginx as reverse proxy and PM2 for Node.js process management, achieving stable production uptime.
- Delivered end-to-end order management covering cart, checkout, real-time inventory validation, Razorpay payment gateway integration, and automated PDF invoice delivery via Nodemailer.

- Built an image processing pipeline using Multer and Sharp for upload and compression, and generated Excel-based admin reports for order and inventory tracking.

Client Project Manager: Web Agency Tool [React.js · Node.js · Express.js · MongoDB · JWT · Tailwind CSS] [Live](#) | [GitHub](#)

- Developed a multi-role project management tool for web agencies with JWT authentication, Admin and Developer access levels, full client CRUD, developer assignment, deadline tracking, and chart-based project analytics.
- Implemented server-side pagination for optimised data loading and deployed the full-stack application across Vercel (frontend) and Render (backend).

Employee Payslip Generation System [React.js · Node.js · Express.js · MongoDB · Mongoose] [Live](#) | [GitHub](#)

- Developed a payroll application that stores employee records and generates monthly payslips with print support, automating salary calculations for HRA, DA, allowances, ESI, PF, and leave deductions based on a configurable base salary.

Movie Management App [React.js · Node.js · Express.js · MongoDB · JWT · TMDB API] [Live](#) | [GitHub](#)

- Architected a REST API-backed movie catalog managing 250+ records with JWT authentication, role-based access control (admin/user), TMDB API bulk import, and server-side search, multi-field sorting, and pagination for performance at scale.

CodeMate AI: Code Explanation App [React.js · Node.js · Express.js · AI API] [Live](#) | [GitHub](#)

- Built a full-stack AI-powered code explanation tool that accepts any code snippet and returns plain-English explanations via an AI API integration. Deployed frontend on Netlify and backend on Render.

EDUCATION & TRAINING

MERN Stack Development Bootcamp (Full-Time) | **Brototype** Sep 2024 - Present
Full-stack MERN training with real project development, AWS deployment, payment gateway integration, and REST API development.

ITI in Fitter Technology (NCVT) | 2018

Higher Secondary Education | **Kerala State Board** 2016

ADDITIONAL INFORMATION

Languages: Malayalam (Native), Hindi (Fluent), English (Conversational)
Availability: Immediately available for full-time roles
